

Electronic reports verification

Perform the following steps to verify the authenticity of a document on the Emercoin blockchain.

1. Install the [Emercoin wallet](#) or open it if you have it already installed.
2. Go to the **Manage Name** tab and open the **DPO** tab.

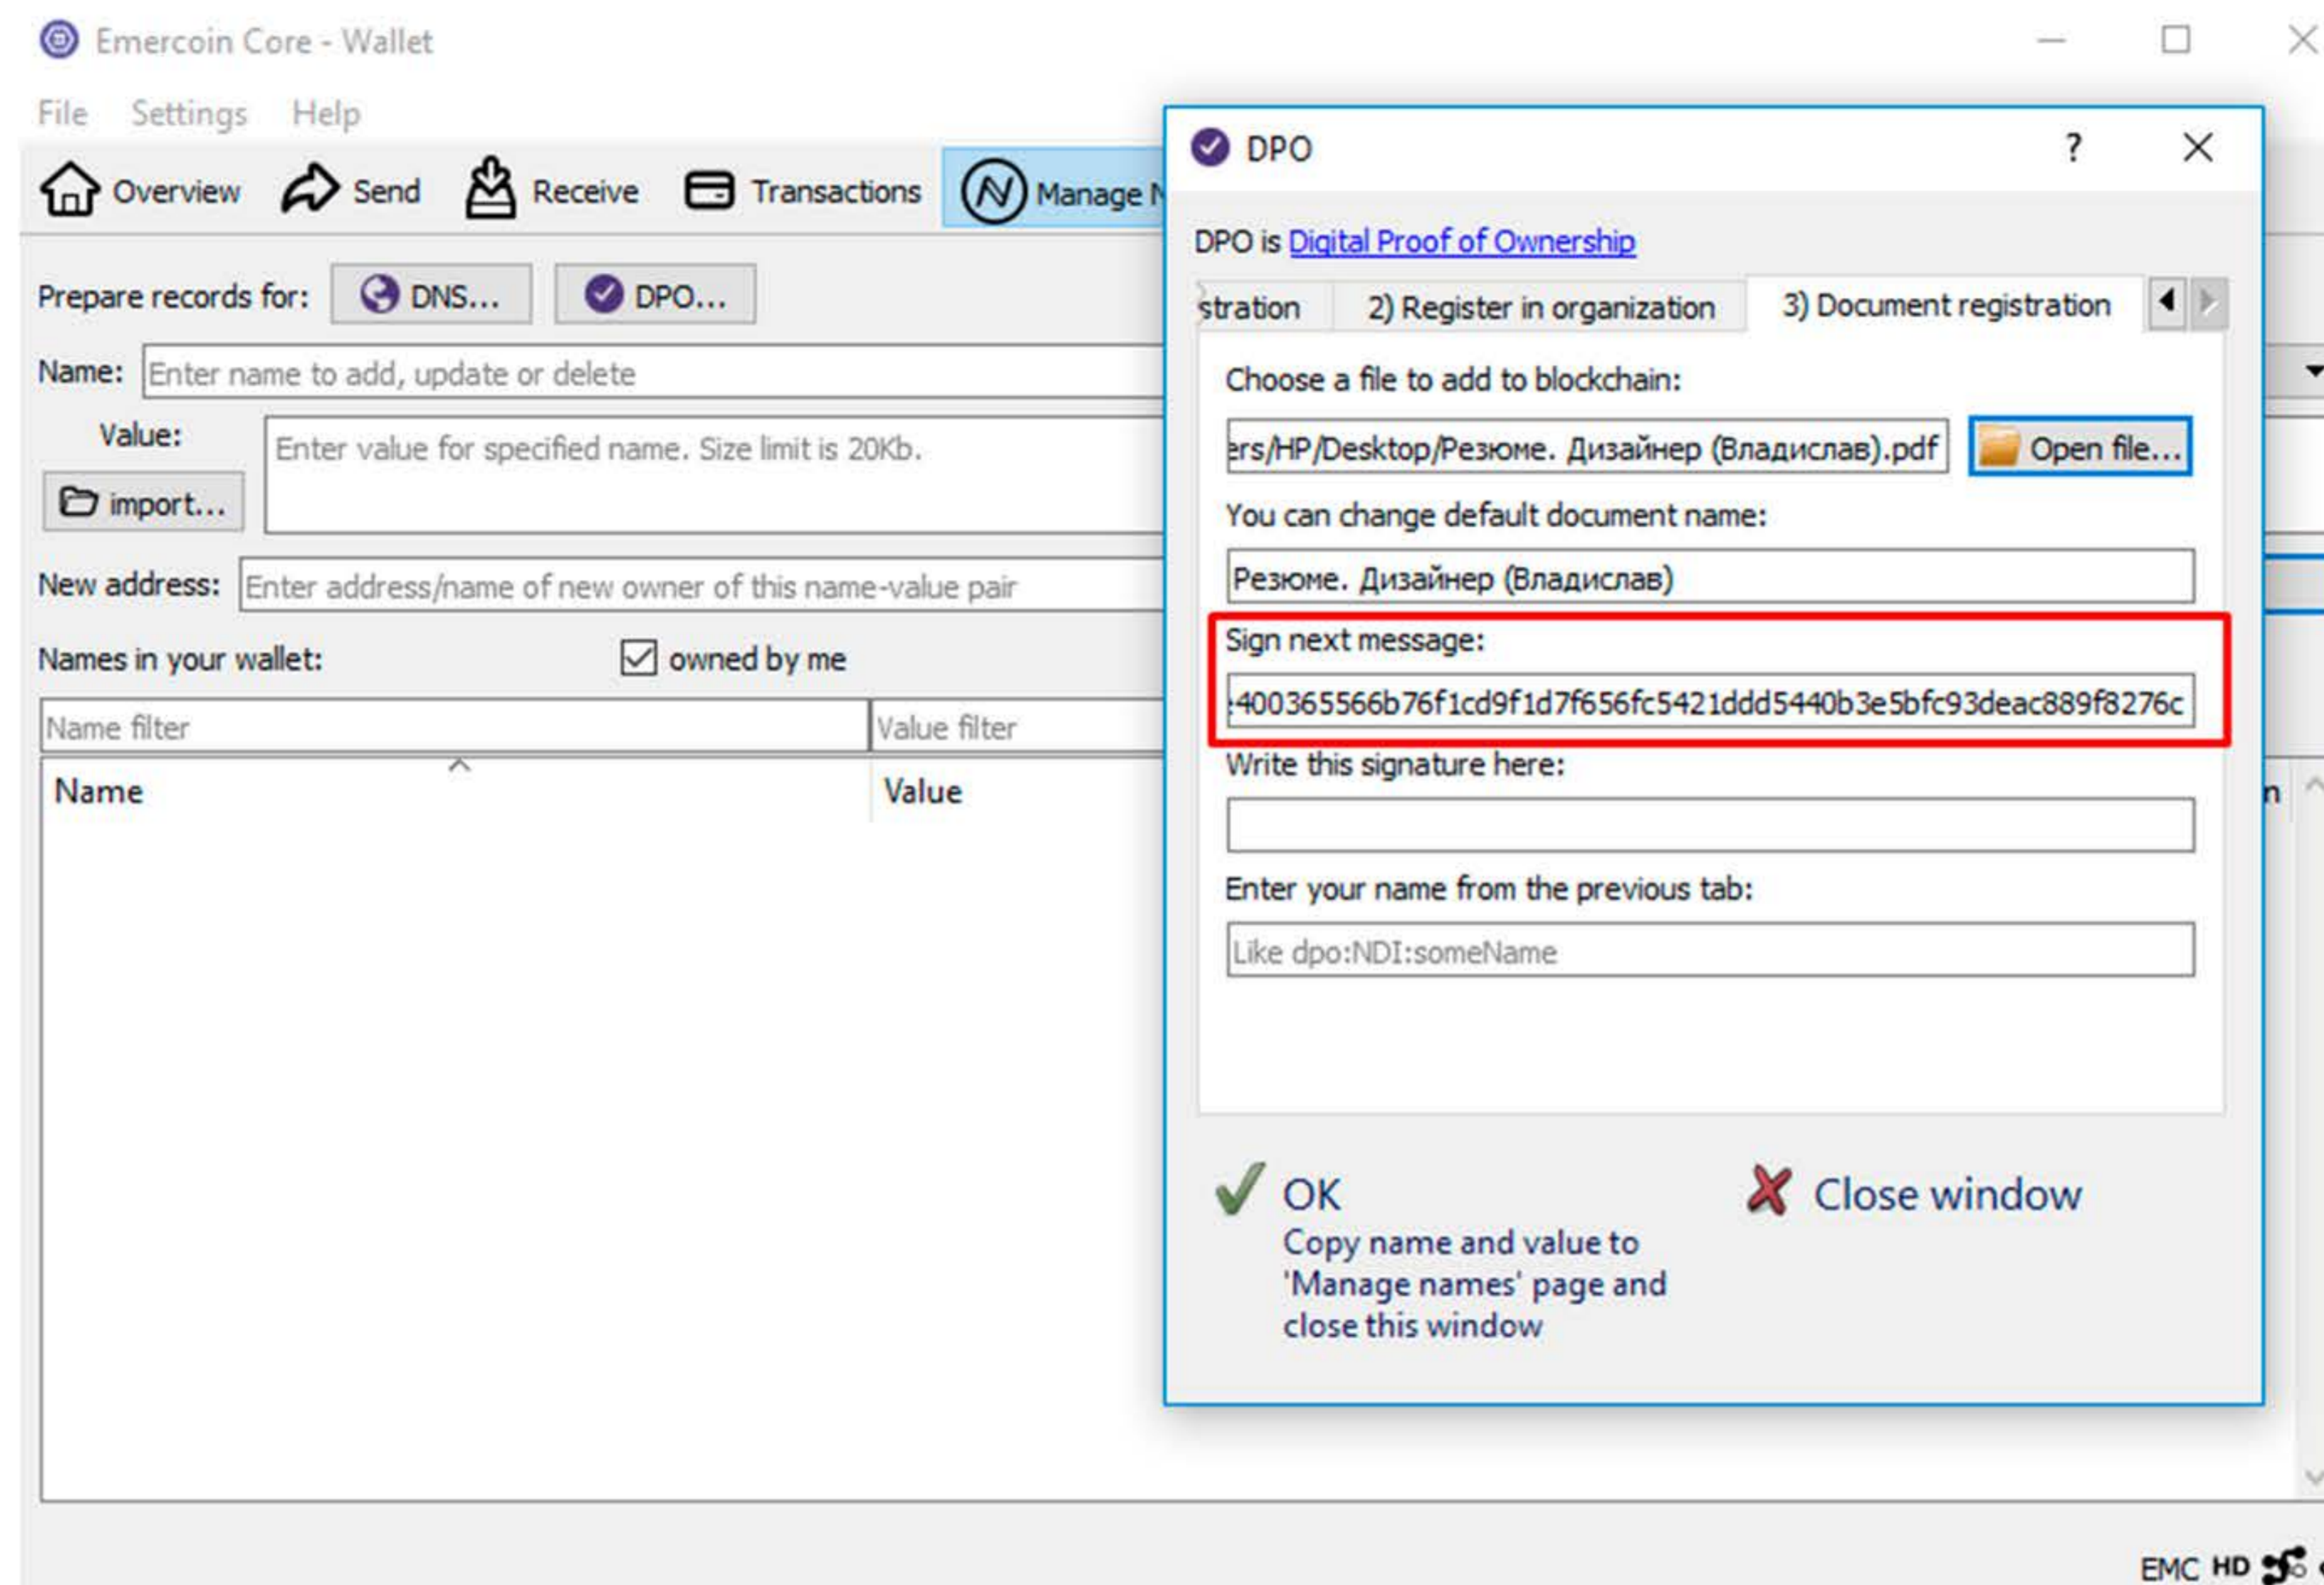

3. In the opened window choose the **Document registration** option.

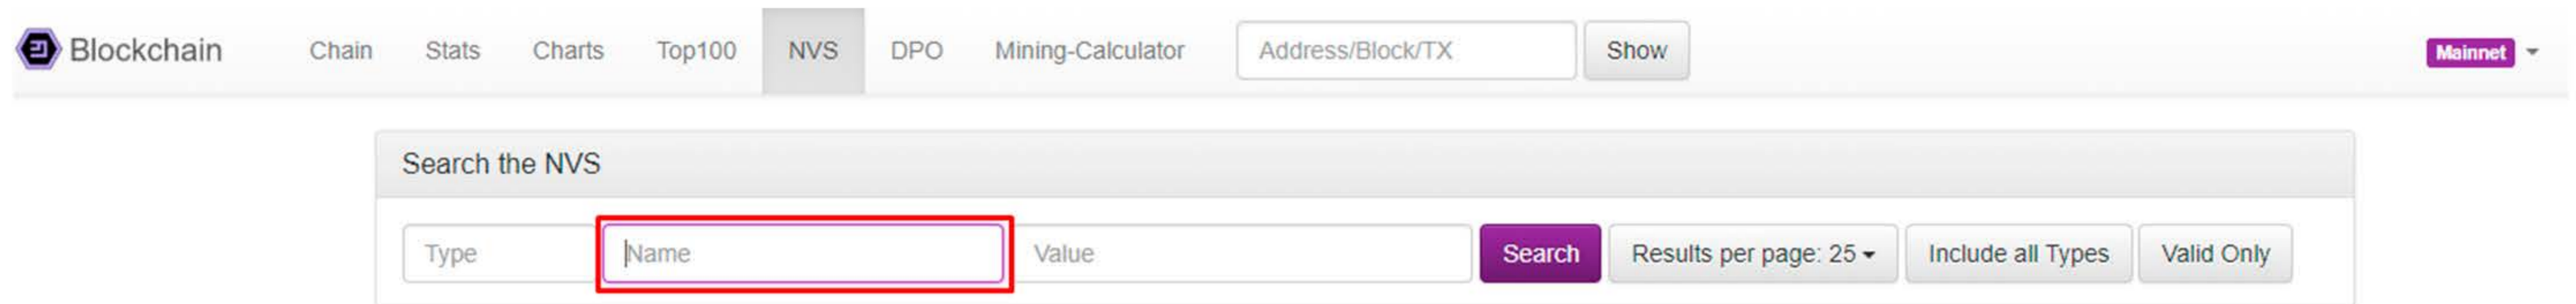

4. Click **Open file** to upload the file you want to verify.

5. After the document is uploaded copy the text from the **Sign next message**.

6. Go to <https://explorer.emercoin.com/nvs> and paste the copied text into the **Name** field.

7. If the hash is not found and the document has not been previously added to the blockchain, no data will be displayed.

8. If the file hash is found, open the block containing information about the document.

| | Value | Registered At | Expires in |
|--|--------------------------------|---------------|------------|
